Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-13, and 30-33, drawn to a semiconductor device, classified in class 257, subclass 730.

II. Claims 14-29, drawn to process of manufacturing a wiring board of semiconductor package, classified in class 438, subclass 25.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the process as claimed can be used to make another materially different product whereby the product can be made without the step of polishing a second surface of the semiconductor substrate.

3. Applicants are advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
